U. S. Patent and Trademark Office PTO-326 (Rev. 3-97)

Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted state of the prior art at pages 1 and 2 of the specification in view of Wesdorp and Singer for reasons of record.

Applicant argues that Wesdorp does not teach a product with a lipophilic flavor. This has been considered but is not persuasive because Wesdorp requires that the product contains a flavor at column 18, line 39. Applicant urges that there is no suggestion in the art to use the flavoring of Singer in a very low fat food. This has been considered but is not persuasive because the Singer reference teaches that his flavor delivery system allows for enhanced flavor compounds to be added to his flavorant to permit improved flavor in non-fat and low-fat foods.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wesdorp in view of Singer for reasons of record.

Applicant argues that Wesdorp does not teach a product with a lipophilic flavor. This has been considered but is not persuasive because Wesdorp requires that the product contains a flavor at column 18, line 39. Applicant urges that there is no suggestion in the art to use the flavoring of Singer in a very low fat food. This has been considered but is not persuasive because the Singer

reference teaches that his flavor delivery system allows for enhanced flavor compounds to be added to his flavorant to permit improved flavor in non-fat and low-fat foods.

Claims 1 and 3-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heertje in view of Singer.

Applicant argues that Heertje does not teach a product with a lipophilic flavor. This has been considered but is not persuasive because Heertje requires that the product contains a flavor at example 1. Applicant urges that there is no suggestion in the art to use the flavoring of Singer in a very low fat food. This has been considered but is not persuasive because the Singer reference teaches that his flavor delivery system allows for enhanced flavor compounds to be added to his flavorant to permit improved flavor in non-fat and low-fat foods.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
